TO WHOM IT MAY CONCERN

The North-West University takes pride in writing this testimonial of service and quality excellence for Secuplus Computer Security.

The university started using the Secuplus security products from as far back as 1996 and has never looked back since. We use their computer security products throughout our campus(es) - in computer labs as well as offices. As a result of the installation of these computer security products, incidents of theft, attempted theft and vandalism of computers have dropped to virtually zero.

Notwithstanding the excellent quality of the product, the service we have received from Secuplus has been exceptional. In the almost 11 years we have dealt with Secuplus, no problem was too big or too small for them to provide us with the right information, advice and personal service we required. In our experience, the service is of a very high quality and very commendable.

We have in recent times tried some other products claiming to prevent theft in order to compare like-for-like. However, in doing so we realised that the quality, presentation, personal service and price relating to Secuplus far exceeds anything else currently available on the market. Hence, when asked, we will recommend Secuplus to anyone wishing to reduce or negate the loss of office equipment.

We would strongly recommend Secuplus to anybody wishing to reduce, prevent and/or minimize the impact that theft will have on the productivity of any institution or business.

We thank your for your excellent service.

Sincerely

Gawie le Roux
IT Consultant
